### Brief Description:

One-and-a-half story, scored brick, Gothic Revival church with a front-gable roof of modern, standing seam metal on a brick foundation with a soldier-course water table. The façade (N) has a gable end wall with concrete coping and is dominated by a center, projection with a single-glazed Gothic Revival window with tracery and concrete sills, which are flanked by flying buttresses stepping back to the main façade wall. The E and W elevations have corbelled/dentilled cornices. The side windows are also single-glazed, smaller than the front, with concrete sills and are separated into bays by pilasters/buttresses with concrete caps. A large, 3-story, castellated bell tower is at the SW corner of the original building, featuring a Gothic, louver vent and corner buttresses with pointed tops. There is a flat roof addition to the S rear.

Outbuildings or secondary elements (if significant, use separate form)
